KA-1328 Handy Pitch Gauge

- 3-in-1 functions: diameter, pitch, length.
- Suitable for male parallel bolts, studs and screws.
- Includes most common sizes in metrics and SAE.
- Convenient tool avoids incorrect bolt, stud or screw installation.
- Material: ABS.

Instructions:

For checking threads

- Find a hole with a similar size to the object (a bolt, stud or screw to be checked) (fig.1)
 - Connect the object to the hole to see if the hole matches the object.
- Note: when the object threads match hole threads, the object can be rotated smoothly. If un-smoothness occurs, it is an indication that the threads do not match. Connection with force may cause hole threads damaged.

For checking diameter

- Position the object against the innermost part of the V-shape groove.
- Find the point where the edges of the object and the gauge touch each other (see the arrows on fig 2), and read the marking.

For checking length

- Place the object on both sides of the gauge (SAE on the right and metrics on the left).
- One end of the object should align the upper line of the gauge (fig.3 and fig.4) and read the marking.

KA-4507 Mini Digital Protractor

Introduction:

This is a measuring tool that provides an immediate, digital reading of all angles in a 360° circle. It is easy to be carried and used for its small size and light weight. Measuring plane containing magnet material can stick to the surface to be measured. It is especially easy to measure bevel angle of miter saw, and any small area surface.

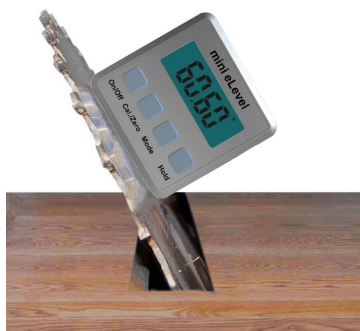

When mount on a rigid platform, this measuring tool allows the sensor and its microprocessor circuit to provide excellent accuracy throughout the Inclinator's 360° range.

Features:

- Small and portable
- Faster and more precise measurement of gradient
- Freezing readout on LCD display
- Level readout in different ways: (°, %, IN/FT)
- Easy to calibration without extra tools
- Magnetic base allows for hand free operation
- Automatic shutdown for power saving, low battery warning

Specification:

- Dimension: 50.8mm x 50.8mm x 31.0mm
- Range: 360° (90° x 4)
- Accuracy: ±0.1° (10~40°C), ±0.2° (0~10°C, 40~50°C)
- Resolution: 0.1°
- Operating Temp.: 0°C ~ 50°C
- Storage Temp.: -10°C ~ 60°C (14°F ~ 140°F)
- Battery: 3V CR2032 x 3
- Weight: 130g

KA-1355 Under Hood Light Bracket

- The under hood bracket telescopes from 112cm to 180cm to fit most vehicles.

KA-MJ300 Micro-Jet

- powered by normal disposable/ refillable lighter
- Instant 1300°C/2400°F micro torch flame
- Auto-ignition
- Pocket size

Specifications:

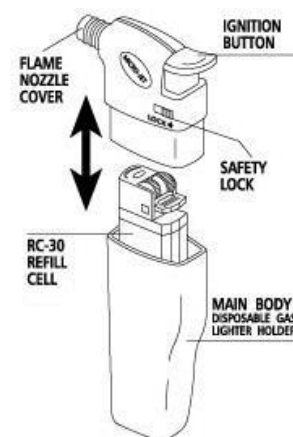

Outer body measure	(H) 110mm x (W) 65mm x (L) 25mm
Weight	60 g
Fuel	RC-30 refill cartridge, disposable lighter or similar product except child proof's
Hours of use	Approx. 20 minutes per disposable lighter
Flame temperature	1300°C blue flame

Features:

- Piezo electronic ignition system-with safety lock.
- Power by RC-30 refill cartridge or disposable gas lighter. Inexpensive and readily available.
- Flame temperature up to 1300°C (2500°F)
- Wind-Proof flame and waterproof ignition make the Micro-Jet ideal for camping and outdoor use.
- Compact size allows the unit to fit easily into any first aid/survival kit or tool kit.

How to use:

- Remove the upper body, then place the disposable gas lighter into the main body. Then, slide the two halves of the body back together. (refer to the figure)
- Switch the safety lock to the unlocked position. Then, slowly press the ignition button to the maximum point. Your MICRO-JET is now fired up and ready to use. (Note: if no flame appears, adjust the regulator on the disposable lighter and press the ignition button again.) As the gas in the lighter is consumed, the regulator will need to be adjusted periodically to ensure a proper flame.
- When the ignition button is released, there will be a short delay before the flame is completely extinguished.
- When the MICRO-JET is not use, remove the disposable gas lighter. (Or refill cartridge)

Warnings:

- Read instructions before use.
- Only use our RC-30 refill cartridge, disposable gas lighter or similar product.
- Do not ignite or use near an open flame, heater, furnace, or combustible material.
- Do not touch the nozzle cover during use, or before sufficient time has passed for cooling.
- Always be sure the unit is cool, and the lighter removed, before storing.
- Store properly when not in use, switch the safety lock to the locked position, keep in a dry place, out of the reach of children.
- Do not attempt to readjust or repair. The MICRO-JET unit is not user serviceable.
- Do not use continuously for more than five (5) minutes.

Caution: The torch flame is almost invisible in daylight, or in strong light.

KA-PT200 Pro-Torch

- Butane Powered
- Child resistant automatic ignition system

The KA-PT200 Pro-Torch features an adjustable high BTU output flame.

The body, constructed of hi-tech polymers provides a sturdy yet lightweight feel and the internal brass and ceramic parts ensure precision operation and long life.

Use this affordable tool in the shop, lab, kitchen, garage or wherever a reliable butane torch is required.

* Colors: black, red, yellow, blue *

Specifications:

Dimension	H	139mm (5.5")
	L	101mm (4.0")
	Grip Dia	34mm (1.34")
	Base	61mm (2.4")
Weight (w/o fuel)		145g (empty)
Fuel		Butane
Torch		1300°C (2400°F)
Hours of nonstop burning		60 minutes (mid. setting)
Gas container capacity		20 ml
Flame Temperature		1300°C (blue flame)

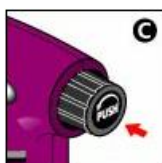

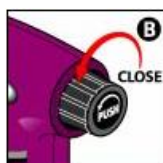

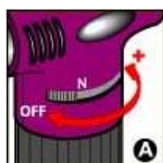

Features:

- State of the art waterproof piezo electronic ignition system. Up to 90 minutes use on each filling. Powerful wind-resistant flame.
- Compact size with ergonomic grip.
- Child-resistant ignition for safety.
- Easily refilled with any brand of butane gas.
- Flame adjustment for any size job.

Instructions:

- Prior to initial use, fill torch with butane fuel as described below.
- To fill gas tank, turn unit upside down and firmly push the butane can nozzle into the filling valve (fig.D)
- To ignite the torch:
 - Slide the gas regulator lever to the "ON" position (fig.A)
 - Rotate the igniter button slightly to the left (counterclockwise) to release the childproof lock (fig.B)
 - The flame can then be adjusted by sliding the regulator lever.
- To shut off the torch, simply move the regulator lever to the far left and until you feel or hear it click into the lock-off position.

Warnings:

- Do not touch flame guard while in use or until sufficient time has passed for cooling.
- Do not immerse heated parts or items in water, allow to cool naturally.
- Use only butane gas in the torch. Do not use propane gas or any other types of fluids.
- Do not store in a temperature exceeding 40°C / 104°F
- Keep away from eyes at all times.
- Keep this unit out of the reach of children.
- The flame of the torch is nearly invisible in bright light or sunlight.
- Make sure that gas flow is turned off when not in use.

KA-PT500 Pro-Torch

- Heavy duty, stable flame, ergonomic grip

The heavy duty KA-PT500 provides the most powerful and stable butane flame available for demanding jobs where the highest BTU output is required. Its precision orifice and controls offer the best there is in a high output butane tool.

The ergonomic grip makes using the KA-PT500 comfortable at most any angle.

KA-PT500 was designed with features to withstand the rigors of daily professional use.

* Colors: black, red, yellow, blue *

Specifications:

Dimension	H	177mm (7.0")
	L	120mm (4.73")
	Grip Dia	45mm (1.78")
	Base	65mm (2.56")
Weight (w/o fuel)		460g (empty)
Fuel		Butane
Torch		1350°C (2500°F)
Hours of nons op burning		200 minutes (mid. setting)
Gas container capacity		60 ml
Flame Temperature		1350°C (blue flame)

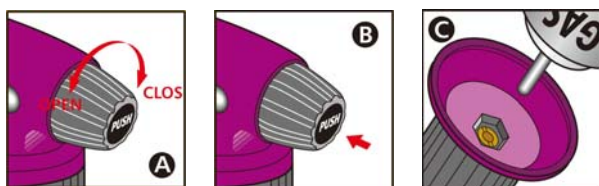

Features:

- State of the art waterproof piezo electronic ignition system.
- Large fuel tank for 200 minutes use on each filling.
- Powerful high output wind-resistant flame.
- Ergonomic designed comfortable grip.
- Angled nozzle to properly direct flame.
- Easily refilled with any brand of butane gas.
- Flame adjustment for the most demanding applications.

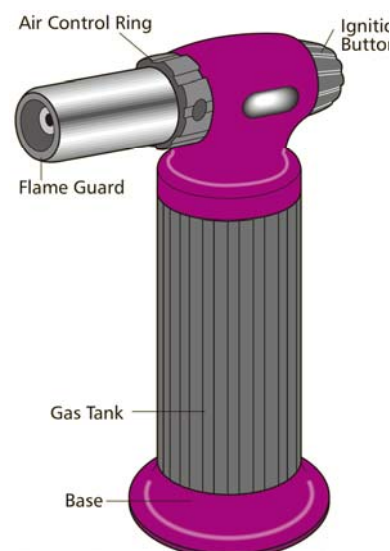

Instructions:

- Prior to initial use, fill torch with butane fuel as described below.
- To fill gas tank, turn unit upside down and firmly push the butane can nozzle into the filling valve (fig.C)
The tank should be filled in approximately ten seconds.
Please allow a few minutes after filling for the gas to stabilize.
- To ignite the torch:
 1. Rotate the gas control knob counterclockwise(left) till hear the gas flow sound.
 2. Depress the igniter button (fig.B) to ignite.
 3. The flame size can then be adjusted by rotating the gas control knob (fig.A) in either direction.
 4. The flame temperature may be adjusted by rotating the Air control ring.
- To shut off the torch, simply rotate the gas control knob fully clockwise (right.).

Warnings:

- Do not touch flame guard while in use or until sufficient time has passed for cooling.
- Do not immerse heated parts or items in water, allow to cool naturally.
- Use only butane gas in the torch. Do not use propane gas or any other types of fluids.
- Do not store in a temperature exceeding 40°C / 104°F

KA-PRO120

KA-PRO120K

(contents: KA-PRO120, Solder, Sponge, PS-14, PS-9, PS-10, PS-3)

Soldering Iron Kit

KA-PRO120 KA-PRO120K

- Power range: 30W ~ 125W
- Automatic igniting
- Portable model, multi-function heat tool
- Butane Powered
- Bold ergonomic design

Features:

- Equivalent to a power range 30-125watt.
- Cordless, simple, safe operation anywhere.
- Ready to use 15 seconds after ignition.
- Tank contains fuel for 120 minutes of operation.
- No cords, can be used anywhere.
- No electrical interference.
- Comes with soldering tip and protective cap.

Specifications:

Length:	w/cap	254mm (10")
	w/soldering tip	245mm (9.7")
Weight(when gas-filled)		166g
Approximate temperature soldering tip		250~550°C (480~1000°F)
Torch		1300°C (2400°F)
Gas container capacity		12 ml
Operating Time (one gas filling)		100 min At mid setting

Applications:

Automotive and truck repairs, Aviation service and repair, Electrical components, Environmental splicing, Field repairs, Insulated solder preform, Jewelry repair, Loosen rusted nuts and bolts, Maintain switch panels, Repair television sets, meters, switch boards, sensitive IC boards, shrink tubing, silver solder, soften window caulking, Solder circuit boards, TV cable systems, Weld plastics.

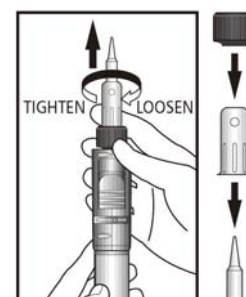

Option accessories: the accessories listed below are available

Parts NO.	Description	Type
 PS-1	1.6mm soldering tip	Conical
 PS-2	3.2mm soldering tip	Conical
 PS-3	2.4mm soldering tip * KA-PRO120K includes	Chisel
 PS-4	3.2mm soldering tip	Chisel
 PS-5	2.4mm soldering tip	Angle

Parts NO.	Description	Type
 PS-6	3.2mm Soldering tip	Angle
 PS-9	Hot Knife * KA-PRO120K includes	--
 PS-10	Heat Blower * KA-PRO120K includes	--
 PS-14	Orifice Assembly * KA-PRO120K includes	--
 S-30	Defleclor	--

How to changing tips:

1. Be sure the tip has cooled before removal.
2. The catalyst seen through the hot air exhaust hole of the soldering tip is very delicate and will not sustain mechanical abuse without serious damage.
3. The soldering tip is easily removable allowing the installation of other style tips or the replacement of a worn tip. After the soldering tip is cool, simply unscrew it with a counterclockwise motion. Be careful not to over-tighten as this could damage the nozzle assembly and thread in the body.

KA-PT600A PRO-Torch

- Automatic ignition propane
- Powered pro-torch

The heavy duty KA-PT600A type provides the most powerful and stable propane flame available for demanding jobs where the highest BTU output is required. Its precision orifice and controls offer the best there is in a high output propane tool. The rotating hand protection plate makes using the KA-PT600A comfortable at most any angle.

KA-PT600A was designed with features to withstand the rigors of daily professional use.

Features:

- Powerful wind-resistant flame.
- Patented rotating hand protection plate for safe use at any angle.
- High output flame for plumbing and other heavy duty jobs at home and in the workplace.
- Use safely at any angle.

Specifications:

Dimension	H(w/o stand)	138mm (5.4")
	L	100mm (3.9")
	W	36mm (1.4")
Weight (when gas-filled)		280 g
Torch		1300°C (2400°F)
Gas container capacity		60 ml
Operation capacity (one gas filling)		120min. At mid setting

Applications:

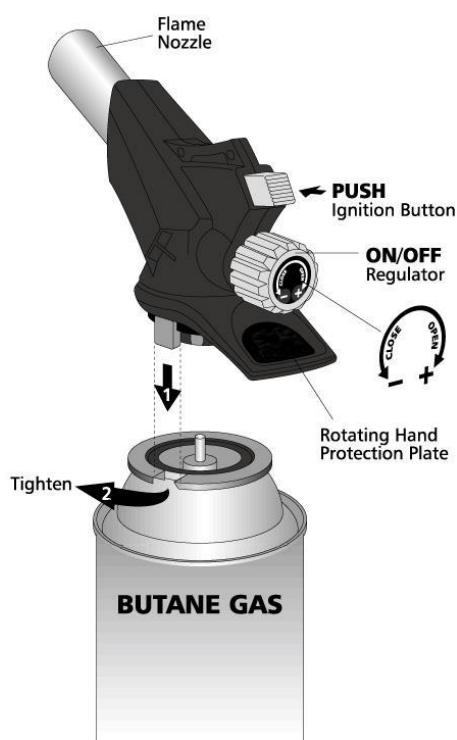

Brazing, soldering, plumbing, BBQ grill charcoal starter, tool and die shops, automotive and truck repairs, industrial maintenance

Instructions:

- Connect KA-PT600A to Butane Canister by pushing down and turning clockwise (right) until it stops. Be sure to align butane output valve with torch input valve.
- To ignite, turn regulator knob counterclockwise (left) approximately 1/4 turn to start the gas flow and then push ignition Button. You may have to push ignition button more than once depending on conditions.
- Rotate regulator knob to the LEFT for higher flame or to the RIGHT for lower flame.
- If using the torch upside down, the flame may continue to burn for 10 seconds after turning off gas.
- When replacing or disconnecting the butane canister, make sure that the regulator knob is tight in the OFF (right) position to avoid leaking.
- Disconnect torch from cylinder when not in use.
- Within 2 minutes of ignition, the flame may appear red. During this time the torch should only be used in an upright position. After 2 minutes of preheating the torch may be rotated to any angle.

Warning:

- Only use the torch in a well-ventilated area.
- Carefully follow the instructions and warnings and familiarize yourself with the torch before use. Failure to follow these instructions could cause property damage, personal injury or death.
- Be aware that the tip of the torch can get extremely hot during or after use. Keep the torch away from children. Do not touch the torch nozzle after use.
- Never connect to a fuel cylinder near any flammable materials, chemicals, liquids or gases.
- Always point the torch flame away from the flammable objects or materials (such as walls, ceilings...etc.) Be especially careful around any gasoline and fuel products.
- Never storage the value body with the combustibile material.

KA-PT600E PRO-Torch (European Type)

- Automatic ignition propane
- Powered pro-torch

The heavy duty KA-PT600E type provides the most powerful and stable propane flame available for demanding jobs where the highest BTU output is required. Its precision orifice and controls offer the best there is in a high output propane tool. The rotating hand protection plate makes using the KA-PT600E comfortable at most any angle.
